

# MOTH WATCH

September 2009

1990 Striped Hawk-moth (migrant)

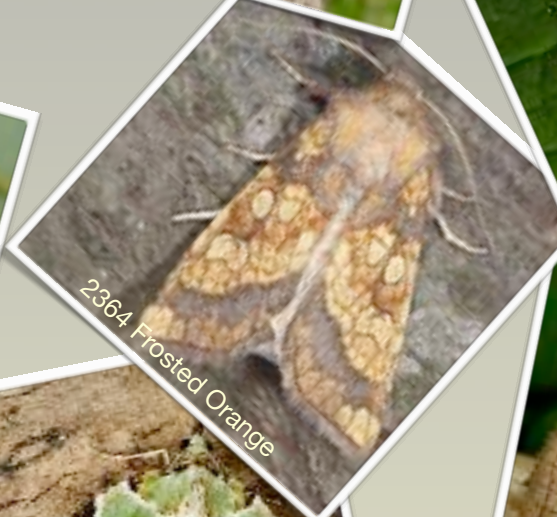

2247 Merveille du Jour

2271 Orange Sallow

1913 Canary-shouldered Thorn

2364 Frosted Orange

2434 Burnished Brass

1776 Green Carpet

2306 Angle Shades

1906 Brimstone Moth

2441 Silver Y (migrant)

2273 Pink-barred Sallow

We're taking part in the National Moth Night as part of WASP, our Wild About Science Project. We're running a moth-trap overnight, recording the species we catch and sending in our results. The organisers are particularly interested in recording migrant species so let's hope we get some warm southerly winds!

A selection of autumnal moths are shown above. Aren't they colourful?
